### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 25 March 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION*****Election/Restrictions***

Applicant's election with traverse of species N (figs 18-22) and figure 41 in the reply filed on 3/24/05 is acknowledged. The traversal is on the ground(s) that other figures should have been included in species N. This is not found persuasive because, in general, applicant has not provided evidence or identified such evidence of record showing the groups to be obvious variations of one another. Even though applicant states that each of the other species have features in common with the elected species, each of the argued species also contain additional structures or function differently which makes those species patentably distinct, unless evidence is provided otherwise. For instance, fig 11 shows an area of thinned flexible material, similar to the elected species. However, this area of thinned material varies in thickness from one end to another and this distinct feature is not found in the elected species. Figures 23-27 show solid and hollow projections like the ones in figures 18-22; however, these embodiments only include the application of negative pressure and do not function with both negative and positive pressure like the elected species. Finally, figure 28 includes the feature of stiffening ribs; this distinct structure is not included in the elected species.

The requirement is still deemed proper and is therefore made FINAL.

Claims 9 and 15-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 3/25/05.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 41 is rejected under 35 U.S.C. 102(b) as being anticipated by Adams (USPN 4,249,481). Adams discloses an outer shield part (14) having a funnel-shape with a widened upstream end and a tubular portion (20) downstream end; a flexible shield part (12) that generally conformed to the internal funnel shape having an internal side wall (see figure below); one or more projections (13) having an area of weakened material that is connected to a source of positive pressure (16); and a fluid passageway (lumen of 24) with a source of negative pressure (18). See figure 2.
